DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 4, drawn to a data processing control apparatus, classified in class 710, subclass 40.
 - II. Claims 2-3 and 5-6, drawn to a DMA controller, classified in class 710, subclass 22.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the DMA controller of the invention II can be used to read a data from a memory and do not require the data processing control apparatus as required by the invention I.
